

PRODUCTS & SERVICES

PRIMARY WIRELESS INTERNET SERVICE PROVIDER

Wireless 4G LTE is ideal for primary connectivity in situations where wired networks are unavailable, unreliable, or impractical.

FAILOVER WIRELESS INTERNET

Make internet outages a thing of the past! Within 10 seconds, our router will provide a wireless connection to your mission critical systems.

CONSTANT CONTACT

Overcome cellular network congestion for high-volume special events: football games, concerts, or any large event gatherings. No additional equipment needed.

REMOTE POWER SWITCH

Eliminate your power cycle service calls by utilizing our RPS to power cycle your equipment remotely (via our cloud management system or sending an email or text).

ROUTERS

Our routers pass PCI DSS Vulnerability scanning every time.
